B. Bo Denysyk Memorandum Microelectronic Case Study on the USSR, dated 7 Oct 1982

The STIC has recently published the referenced microelectronics case study. This study was originally done at the request of Deputy Assistant Secretary of Commerce for Export Administration, Bohdan Denysyk. This is the first comprehensive technology transfer case study done by the Intelligence Community relating technology transfer and military use of transferred technology. The four STIC working group members [redacted] 25X1
[redacted] and Lyman Hall, Army/FSTC) did an outstanding job of preparing this study for Secretary Denysyk on very short notice. I feel strongly that their efforts be recognized. If you concur, I have attached memoranda of appreciation for your signature. [redacted] 25X1
